

Sairam R

Computer Science Student

9025915404 | sairamr9025@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE

B.Tech student in Computer Science and Medical Engineering with experience in full-stack development, IoT systems, and healthcare AI, seeking to build impactful technology through practical engineering and innovation.

EDUCATION

B.Tech in Computer Science and Medical Engineering, Sri Ramachandra Institute of Higher Education and Research, Chennai (GPA: 7.3/10) Aug '23 — Present
SLC, Sethu Bhaskara Matriculation Higher Secondary School, Chennai (Percentage: 79.33) Apr '23

INTERNSHIP EXPERIENCE

Sri Ramachandra Institute of Higher Education and Research Jun '24 — Aug '24
Intern - Web Development Chennai
• Engineered a responsive car listing web app using HTML, CSS, and JavaScript, enhancing cross-device UI performance and accessibility for end users.

Micro Information Technology Services Jun '25 — Aug '25
Intern - C++ Programming Chennai
• Implemented modular C++ solutions applying OOP principles, data structures, and file handling to develop efficient, reusable code components.

Apollo IT Department Dec '25 — Jan '26
Intern - Full Stack Development Chennai
• Architected AHC Recommendation Beacon — a UHID-driven AI system aggregating multi-hospital data, masking PII, and running 4 LLMs in parallel to generate diagnostic test recommendations with automated PDF reporting.

PROJECTS

MedGAN Studio
• Architected a full-stack conditional DCGAN pipeline to synthesize class-balanced medical X-ray images with SSIM and proxy-FID quality evaluation, validated via a SmallCNN classifier and visualized through a real-time React + FastAPI monitoring dashboard.

Candidate shortlisting system
• Built a full-stack Candidate Shortlisting System with role-based access control, JWT authentication, and MongoDB, enabling structured multi-role hiring workflows.

SKILLS

Programming Languages C, C++, Python, JavaScript
Web Development HTML, CSS, React.js, Node.js, Express.js, REST APIs, JWT Auth, Responsive Design
Machine Learning & AI PyTorch, TensorFlow, Scikit-learn, OpenCV, CNN Models, GANs (DCGAN), Tesseract OCR, LLM Integration
Tools & Platforms VS Code, Google Colab, Streamlit, Git, GitHub, Postman, Vercel, Netlify, Render
Data bases MongoDB, PostgreSQL, SQL

SOFT SKILLS

- Cross-functional Collaboration, Analytical Thinking, Rapid Prototyping

ACHIEVEMENTS

Project Presentation Recognition Mar '24
Sri Ramachandra Institute of Higher Education and Research
Recognized at department-level technical expo for demonstrating end-to-end project design and development skills.

Business Analyst Assessment Certification May '25
Learntube.ai
Completed to strengthen understanding of business process evaluation and requirements analysis — applied directly in healthcare AI project development.

ACTIVITIES & INTERESTS

- State-level Badminton Player** — Represented at competitive state-level tournaments, demonstrating sustained discipline and performance excellence.
- Singer** — Performs at college cultural events, blending creativity and vocal expression with a passion for music production and audio design.
